Putting People With Disabilities to Work for More Than Half a Century

THE RESOURCE CENTER
Making a Difference in People

The Resource Center (TRC) is not your typical manufacturer. Yes, we provide labor and product development solutions for our customers. But we also provide education, training and employment opportunities to people with disabilities in Chautauqua County.

Our mission is to help people with disabilities achieve maximum independence, contribute to their communities, experience lifelong growth and enjoy a high quality of life.

One of the ways we do that is by helping people—who otherwise wouldn't have an opportunity to work—secure meaningful employment. We teach them the skills they need to succeed in the workplace. Then we put them to work in one of our manufacturing facilities or help them find competitive jobs in the community.

TRC currently employs 400 workers with disabilities, and we're always looking for ways to increase that number. But we can't do it alone.

Are you ready to be a part of our mission and help us put more people to work?

LABOR SOLUTIONS FOR YOUR MANUFACTURING BUSINESS

When you don't have the time, space or workforce to meet the demands of your customers, TRC can help. Through our manufacturing division, Allied Industries, we provide subcontracting solutions to help you tackle production bottlenecks and keep your operation running smoothly. Our capabilities include kitting, packaging and assembly.

Your facility or ours. Short-term or permanent. Let us know what, when and where, and we'll take care of the rest. We've completed hundreds of jobs for dozens of manufacturers, and there's almost nothing we can't do.

You can count on our experienced staff to find a solution that works for you. And here's what you can expect when you work with us.

Unparalleled Quality. Worried about errors? You won't find them here. Our employees insist on getting it right, every time. We're certified to **ISO 9001:2015** standards by American Global Standards Registrar, and we set up our processes to ensure our work is free of defects.

Affordable Solutions. We provide a low-cost alternative to completing your project in-house. In many cases, we can get your product assembled, manufactured and shipped faster and cheaper than you can internally, saving you time and money.

Quick Turnaround. Are you working under a tight deadline? We have the flexibility to react quickly and put together the workforce necessary to complete your job on time. Sometimes in as little as 24 hours.

Large Workforce. No job is too big. When your workload exceeds your employees' capacity, and you don't want to hire temporary workers, we act as an extension of your workforce to get the job done.

Extra Space. With 105,000 square feet of floor space spread across two facilities, we can add additional jobs to our pipeline when your capacity is maxed out.

Creating customized solutions to meet the unique needs of our manufacturing customers is what we do.

Let's start solving your production challenges today.

PRODUCT MANUFACTURING AND DEVELOPMENT FOR YOUR MILITARY CONTRACTS

We've supplied military products to the U.S. Armed Forces since 1978. Whether you need to refine an existing product or develop an entirely new one, TRC has the experience and expertise to deliver the solution you need.

We specialize in sewing and kitting, allowing us to provide a variety of items to satisfy the requirements of your contracts.

After nearly four decades, we know how to respond to the demands of the Armed Forces. We understand how quickly the military's needs can arise and how quickly they can change. That's why we offer the following:

Experience and Innovation. Need a prototype for a new product? Looking to enhance an existing one? We leverage our military experience and expertise to develop new products and make improvements to existing ones that meet stringent military guidelines.

Fast Response Times. You can't always predict when you'll need a product shipment. Natural disasters, military action and other world events can happen with almost no warning. When they do, you have to respond. And, so can we. We're accustomed to ramping up production at a moment's notice without sacrificing quality, so you get the products you need quickly.

Superior Quality. When the products you make are used in life or death situations, there's no room for error. You're serious about quality control, and so are we. We're certified to **ISO 9001:2015** standards by American Global Standards Registrar and our manufacturing process has been approved by the U.S. military for decades.

Cost Control. You need high-quality products, but you also have a budget. We offer military grade products at competitive prices.

Made in the U.S.A. These aren't just buzz words to us. Our employees take pride in creating products the men and women who serve our country use every day. Our items are produced by U.S. workers, using only American-made materials.

Taking projects from design to production, including materials research, is our specialty.

Let us help you with your product manufacturing and development requirements.

Together, we can develop a solution that meets your needs and transforms people's lives. Let's get started today.
